Luminous ceiling panels

The luminous ceiling panels represent the new generation of lighting design. They are an extremely effective way to create contemporary, high-quality aesthetics while adhering to environmental responsibility and meeting functional requirements.

Our luminous ceiling panels are easily customizable and use sustainable technologies to provide uniform low-glare lighting. We have manufacturing capabilities, production capacity and industry experience, enabling our team to design lighting solutions based on the individualized needs of customers (aesthetics, functionality, business and logistics).

Our team collaborates with leading architectural practices to provide luminous ceiling panel solutions, playing a significant role in the most iconic buildings.

Enjoy unlimited lighting freedom

Whether in terms of form or function, the illuminated ceiling display cases represent the future of LED lighting. Developed to transform the indoor environment, it asserts itself with confidence and purpose, and harmonizes with balance and contemporary elegance. The illuminated ceiling display cases offer an incredible range of customization and optimization, and are a valuable asset for widespread application. It can create fashionable and highly functional LED lighting systems. This can be designed according to the architecture, aesthetics, environment and business needs of your space.

- ◆ The adjustable-lumen LED can be managed in real time, so the brightness levels can be adjusted according to the personal preferences and functional requirements of the users.
- ◆ The color-adjustable LED can be provided as required, enabling users to easily and instantly change the color temperature of the ambient light in the space. The ability to use different colors ensures that the indoor space, people and objects are presented in the most realistic colors.
- ◆ Compared with the LEDs used in competing products, the LEDs of SanNan One light one space are both brighter and more energy-efficient.
- ◆ Individual LED components can be fixed on a single diode board to create a forceful flat light box, with a customizable shape and size range that is unparalleled (see the figure below)

Specification parameter

DC24V	ORSAM SMD3020	IP33	SIZE 990*18*10
175°LENS	CE /ROSE/FCC	3000K/4000K 6000K/10000K	REMOTE CONTROL UNIT

Visual Impact: Bringing Spaces to Life

Made from specially developed aluminium profiles, the luminous ceiling plane frame offers a range of different fixing methods, seamlessly integrating with the existing interior architecture of your space.

It is made of specially developed aluminum material. The illuminated ceiling plane frame offers a range of different fixing methods, seamlessly integrating with the existing interior architecture of your space.
